There is just about as much water in Stillmanville as there was earlier in the week, which would indicate that it will be several days before the yards and cellars of many of the homes and basements of the stores in that section of the town are free from the nuisance. The Pawcatuck Woolen mill at Potter Hill has decided to close down its plant for the rest of the week, as there is so much water on the premises.

Much Blasting in Sewer Construction—Wedding Anniversary—Pequot Council's Appropriations—Praise for Henry R. Palmer's Book.

Work on the sewer trench at Water and Grand streets is slow owing to the heavy boulders found in digging. Blasting has been necessary and the street along the line of the trench has the appearance of a quarry bank.

The street crossing at Pearl and Main streets is the scene of the setting of large stones which will require much work. Only one place has been harmed since the blasting has been done and only a few pieces of granite have been broken in the so blasted that have been necessary thus far.

Workmen have been engaged in making repairs to the dam and road way at Dean's Mill park, where the heavy rains of the past few days caused a washout.

## AN ATTRACTIVE VOLUME.

Henry Robinson Palmer's History of Stonington Praised by Discerning Critics.

Concerning Henry Robinson Palmer's Stonington by the Sea, the Boston Monthly for April says: "Mr. Palmer set out to provide a comprehensive and readable history of his native town; this he has done, but in a manner much more than that the history is a masterpiece of literary art and a good deal more than a Stonehenge Baedeker; it is a piece of literature. If the reader of these lines doubts this statement, let him read the first chapter of the old town by the sea. Mr. Palmer has at one stroke made a contribution to history, to literature, to sound and handsome bookmaking and to the laurels of the class of '92."

## PUTNAM.

YOUTHS FORGED CHECKS.

Alfred Lafontaine and Armand Bibeault got \$72 on Bad Paper.

Up to Wednesday afternoon four bad checks had come into the First National bank from two boys, now missing from their homes in this city. The youths, who are liable to prosecution for forgery, are Alfred Lafontaine, 21, and Armand Bibeault, 23.

The total called for by the four fake checks which they drew, forging them on Pierre H. Murray, was \$72. The boys worked at one time, is \$72. The losers through the crooked transactions of the two young men seems to be Louis Cloutier, who has a saloon in the Providence street section of the city, and G. N. Durant, operator of a grocery store on Church street. They cashed the checks for the youths, but at the bank the forgeries were immediately detected.

The first heard about the forgery matter was early Tuesday afternoon. At that time Captain Murray was in hopes of getting the boys, and was awaiting action on the part of one of the men who had cashed the check, the latter indicating that he would be satisfied if he could get his money back.

In the meantime, however, the boys had left town and have not since been seen.

The Bibeault boy's mother says that the last she saw of him was Tuesday at about 9 a. m., when after spending some time in his room with two other boys, he came down, took her good-bye and went out, going toward Grosvenorville, with one of the boys.

The first two bad checks that made their appearance were the ones passed on Mr. Cloutier. One of these checks is for \$25, the other for \$2. In each case the date is April 16, and the number of the check is 19, the larger check being made in favor of Bibeault, the smaller in favor of Lafontaine.

The checks that appeared Wednesday from G. N. Durant are also dated April 14, and numbered 10. The name of the maker is written in cursive, and the checks appear to be forgeries. One of these checks, made in favor of Lafontaine, is for \$20, the other, made in favor of Bibeault, is for \$25.

Mr. Durant said he received the checks Tuesday, accepting them in payment for small purchases, and was so much interested to know being the same method used in feeding Cloutier, drinks being bought at his saloon.

## "M. I. RIGHT" WRONG.

So Police and Others Think Who Have Seen Evidence of Firebug.

"M. I. Right" whose name does not appear in the city directory, sets up in print the theory that the "Putnam corporation" is a daily paper that circulates in Putnam, relative to the police having evidence that convinces them that the fire at the Fair Grounds was incendiary, is all bunkum. This proves an interesting announcement for the police, as does also M. I. Right's expression of belief that the fire hasn't been any firebug in Putnam during the period since several disastrous fires have occurred here, within a few months.

It is a certain fact that the police have not captured any firebug. But if there is no firebug and has been none here, it would be a small child to know who smeared lard and automobile grease over articles and structures where fires occurred, leaving finger marks, and why such a thing was done; also why a familiar setting for a fire, newspapers, smeared with automobile grease and boxes and other combustible material, were placed under a barn, where they were found on the night after the Wheaton fire.

Likewise it would be interesting to know, if there is no firebug as the police are firmly convinced there is, why heeding from its accustomed place, why excelsior was brought in, and why the whole mass was smeared with lard and afterwards caught afire in the building.

Mr. M. I. Right may be right, the hope is that he is—and then, again, he may be wrong. In any event, the police have collected some evidence in their months of work on the fire cases that the expression "all bunkum" does not begin to contain it. If all that evidence were given to the public there might possibly be less skepticism perhaps.
